**RUSTEN**

Modern decorative effect that recalls the typical colours and textures of the natural processes of iron oxidation (rusting)

Description Inspired by the natural oxidation processes of iron, Rusten comes from the creative combination of two decorative finishes: the Lithos Matt plaster base and the water-based micaceous iron oxide Rusten Finish enamel as a finishing coat. Available in many colour combinations, from the classic tones of rust red to greens, blues and browns or various greys. It provides the opportunity to create modern environments with distinctive personalities in warm and cool shades. Ideal for large walls or small-scale finishing touches, thanks to the grainy surface, with the appropriate lighting it creates environments with striking glints of light.

**LITHOS MATT**

Finishing plaster with matt marble effect

Consumption / Yield rate 1,8 kg/m<sup>2</sup> (total consumption)

Interiors / Exteriors

Main tools Steel trowel, Roller

**RUSTEN FINISH**

Water-based enamel antiqued effect that contains micaceous iron oxide.

Consumption / Yield rate 12,0 - 14,0 m<sup>2</sup>/l (yield)**CONCRETE B**

Decorative effect that recalls the textures of concrete rethought in an elegant contemporary design style

Description Inspired by concrete, Concrete B (Brush) is produced by the combination of two decorative products: Ghibli paint with quartz sand and the siloxane patina Viersil Vel transparent coloured white to finish. Available in different shades, several greys or various blues and yellows, it is a decorative effect for modern elegant residential and commercial environments. The application proposed follows the design of true reinforced concrete with a touch of elegance lent by the fine grain of the product.

**GHIBLI**

Quartz paint with sand effect

Consumption / Yield rate 2,0 m<sup>2</sup>/kg (yield)

Interiors / Exteriors

Main tools Brush

**VIEROSIL VEL**

Water repellent, acryl-siloxane matt glaze

Consumption / Yield rate 7,0 - 8,0 m<sup>2</sup>/l (yield)**CONCRETE S**

Textured decorative effect with a lime base reminiscent of concrete textures spanning contemporary and traditional design.

Description Inspired by concrete, Concrete S (Spatula) is produced by the combination of two lime products: Visolcalce extra fine as textured base coating and Vixalit. Lime-based paint to be used as a tone on tone finish. Available in a design typical of reinforced concrete, in various shades of grey, it is ideal for creating modern environments with aged wall-style textured surfaces typical of contemporary design for the home or elsewhere.

**VISOLCALCE EXTRA FINE**

Slaked lime based plaster

Consumption / Yield rate 5,0 kg/m<sup>2</sup> (total consumption)

Interiors / Exteriors

Main tools Steel trowel, Roller

**VIXALIT**

Lime based paint

Consumption / Yield rate 2,5 - 3,0 m<sup>2</sup>/l (yield)
