

SILK VELVET

Soft touch micro plaster with metallic reflections

Description SILK VELVET is a water based micro plaster that allows to achieve a soft touch, satin, pearlescent and elegant finish with light and shade effects. Thanks to its special formulation it gives the surface a soft velvety and smooth appearance that recalls precious fabrics and their delicate and elegant movements with a light and shade effect. It is available with different pearlescent effect: white, silvery and golden. SILK VELVET is ready to use and ideal for internal decorations

Yield rate 8,0 - 10,0 m²/lt per coat
